

REHABILITATION THERAPIES

Visiting Nurse | Hospice Atlanta has one of the most experienced and innovative rehabilitation service offerings in the industry.

Visiting Nurse | Hospice Atlanta provides exceptional physical, occupational and speech therapy for adults. Serving patients in 26 Metro Atlanta/North Georgia counties, we accept Medicare and Medicaid and are covered by most managed care and private insurance plans.

The Clinicians Make the Difference

Visiting Nurse has a staff of over 40 therapists (physical, occupational and speech) to assist our patients with their rehabilitative care. These therapists are clinical professionals knowledgeable in the latest advances in their respective disciplines and experienced in working with patients in their home environment.

Technology that Improves Care

Each Visiting Nurse therapist has his or her own laptop that is taken into the home making the entire patient chart available to the clinician at the click of a button. Progress notes and summaries can be faxed to facilities or physician offices upon request. Vital signs are monitored on each visit and therapists have the ability to work within established pathways that might be prescribed.
